

UNIVERSITY HALL  
THE UNIVERSITY OF WESTERN AUSTRALIA

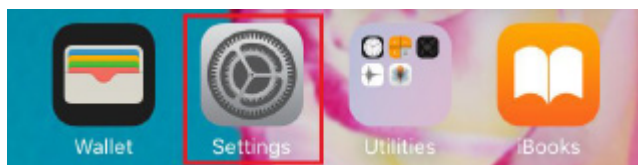

# Unifi on iOS and Android for UWA Students

# Unifi on iOS9

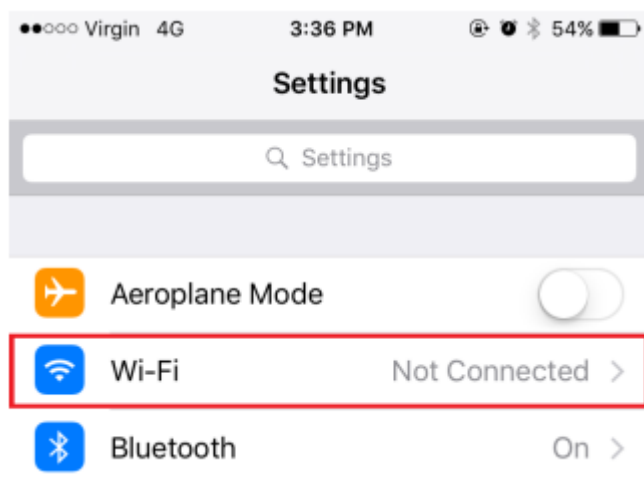

## Step One

Open the **Settings** screen.

## Step Two

At the top of the screen select **Wi-Fi**.

## Step Three

If the **Wi-Fi** switch isn't already on, switch it to the green position.

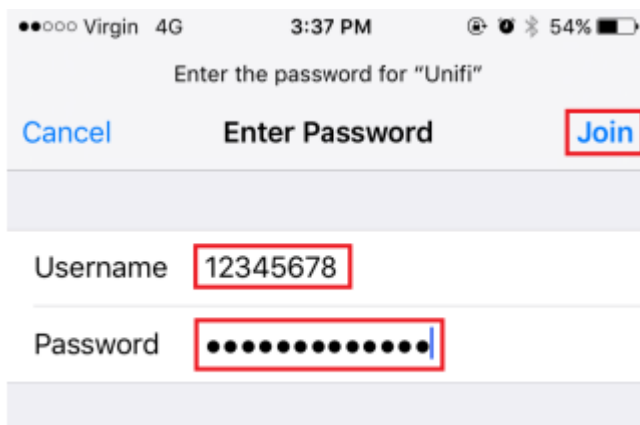

## Step Four

Enter your credentials.

**Username:** Your UWA Person ID (eg, 12345678)

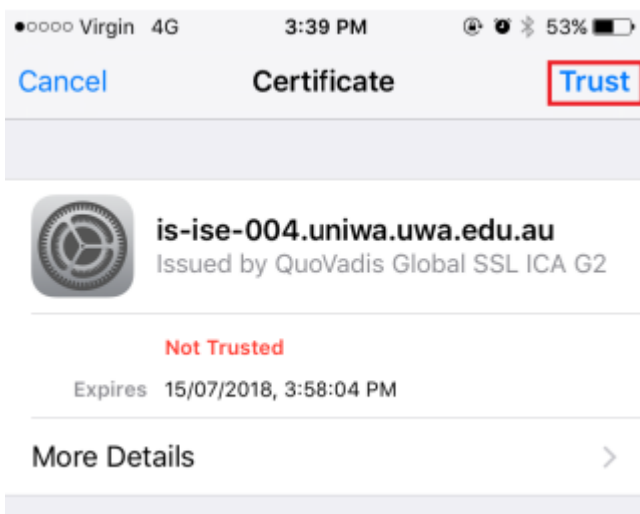

**Password:** Your PHEME password.

Tap **Join**.

## Step Five

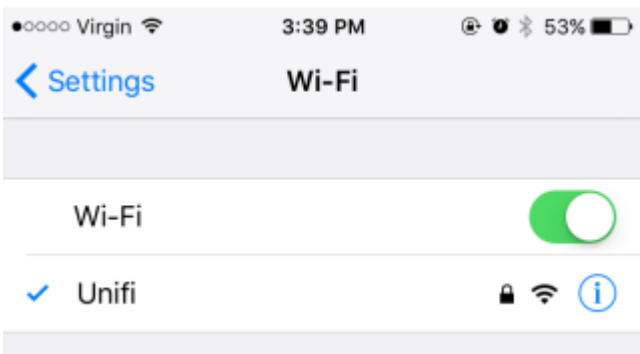

On the following **Certificate** screen tap the **Accept** button.

## You are done!

If you are successful you will be returned to the **Wi-Fi** screen and a tick will appear next to **Unifi**.

When you are connected to a wireless network you will be able to see the Wi-Fi icon in the top left corner of the

## Doesn't work?

Help is available! But before coming for help, please try the following:

- Double-check your student number and PHEME password are correct and your password has not expired
- Move around to ensure you are in a location with good wireless reception

If it still doesn't work, contact the University Library.

In person: At the information desk in your subject library

Telephone number: (+61 8) 6488 1255

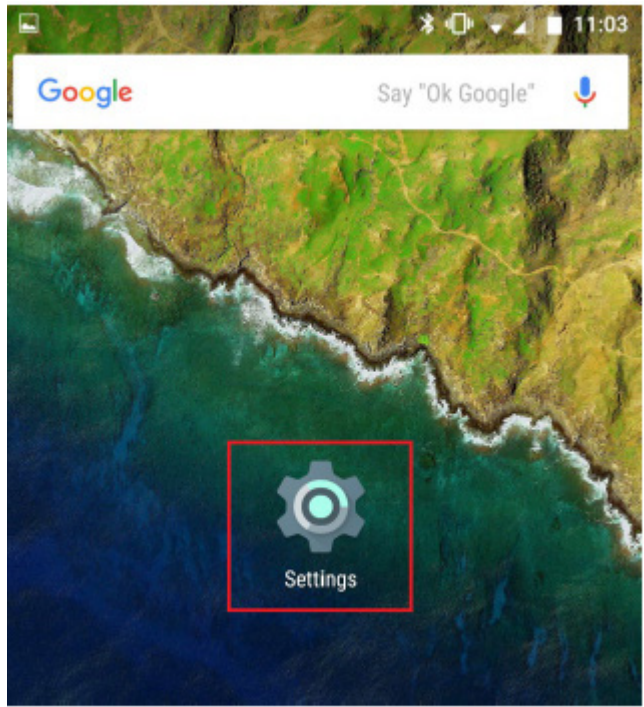

Self-service or email: [ipoint.uwa.edu.au/app](mailto:ipoint.uwa.edu.au/app)

# Unifi on Android

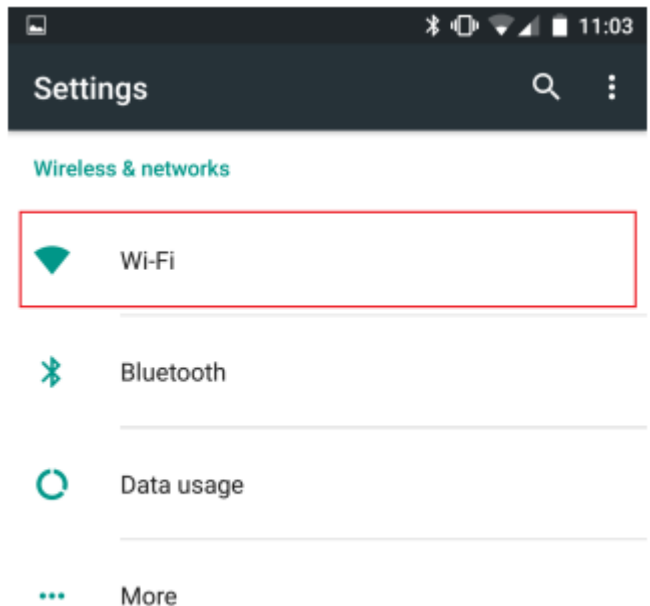

## Step One

Navigate to the 'Settings' menu.

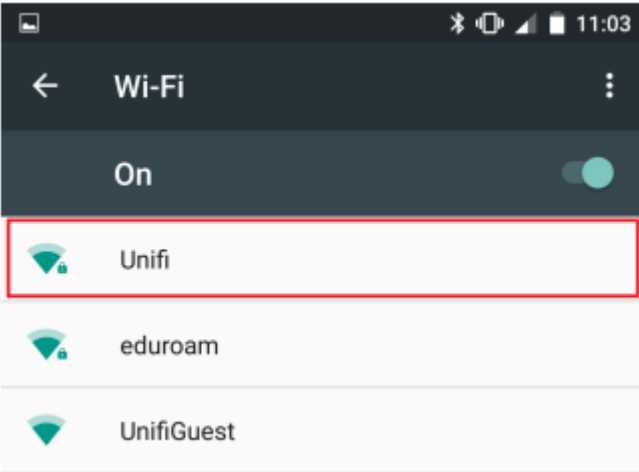

## Step Two

Select 'Wi-Fi'.

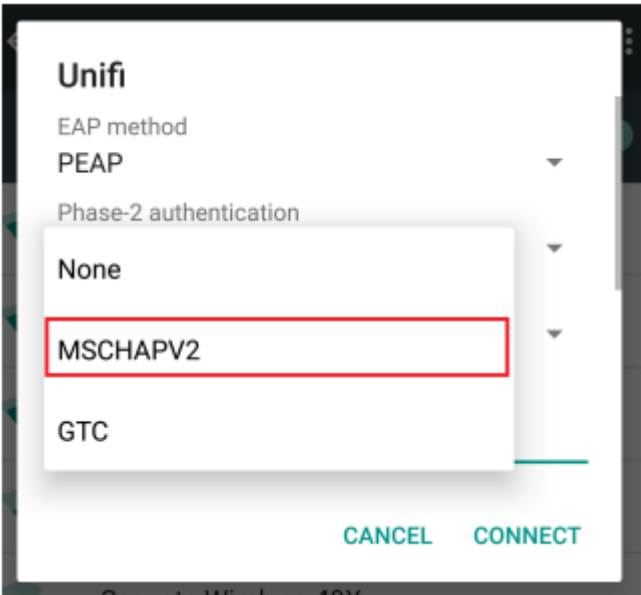

### Step Three

Select 'Unifi'.

### Step Four

Ensure the '**EAP method**' is set to '**PEAP**'. Tap on the '**Phase 2 authentication**' drop down menu, and choose '**MSCHAPV2**'.

## Step Five

Scroll down and enter the following details:

- CA certificate: leave as '(unspecified)', if this option does not appear select 'Do not validate'
- Identity: Your UWA student number, eg 12345678
- Anonymous identity: leave this field blank
- Wireless password: Your PHEME password

Tap on **'Connect'**.

Please note on later version of Android "Do not validate" is no longer an option, select "Use system Certificate" instead and enter "wireless.uwa.edu.au" in the domain field.

The image shows a mobile application screen titled 'Unifi'. It has a dropdown menu for 'CA certificate' currently set to '(unspecified)'. Below that is an 'Identity' field containing the text '12345678'. There is an 'Anonymous identity' field which is empty. A 'Password' field is shown with masked characters (dots). At the bottom right, there are two buttons: 'CANCEL' and 'CONNECT'.

The image shows a mobile application screen titled 'Unifi'. It has a 'Password' field with the placeholder text 'Enter password'. Below that is a 'CA certificate' section with the option 'Use system certificates'. Underneath is a 'Domain' field containing the text 'wireless.uwa.edu.au'.

## You are done!

After a few seconds the device should notify you that the connection was established successfully. You now have internet access.
